

## ATTESTATION FOR PROFESSIONAL INSTALLATION

- **Purchasing Methods**

- The MD4000 product family is not available by retail or by mail order
- The MD4000 product family is available through the following channels:
  - Trained distributors and systems integrators
  - Direct sales to customers after customers get trained

- **Installation**

- The MD4000 family of products requires professional installation by trained personnel
- Installation of MD4000 family of products requires the user to know about the Meshdynamics Network Management System, the terms and definitions used by Meshdynamics Structured mesh™ technology.

- **Training**

- Meshdynamics conducts a Installation training program for distributors and customers
- This training program covers all aspects of installation and maintenance, including but not limited to:
  - Meshdynamics Network Viewer,
  - Meshdynamics Hardware/Installation guide,
  - Structured Mesh™ technology
  - Antennas and RF
  - IEEE 802.X and Layer-2 networking
  - TCP/IP.

The engineers and technicians installing the MD4000 are trained on how to program the device ☐ to not operated in the frequencies bands that have not yet been authorized. Also, software has been ☐ developpe were an error will be displayed if the radio is being program to operated frequencies not ☐ yet authorized.

A handwritten signature in black ink, appearing to read "Francis daCosta".

Francis daCosta, CTO  
Meshdynamics, Inc.
